FilmBuff is a worldwide online video service connecting passionate audiences. We provide unlimited catalogue of TV series and movies across all genres, ranging from fantasy, drama, comedy and documentary. **FilmBuff** is free and further will be available to stream across all devices: via mobile and tablet.

FilmBuff is an online video guide that allows you to easily search & discover over 1 million TV Shows and Movies across hundreds of stocks all in one place. Soon will be available on our apps in both the iOS and Android app stores, **FilmBuff** will transform your phone, tablet and laptop into a personal on demand home theater giving you the ability to watch anything, anywhere.

Shodmonov Musobek: (Back-end)

Has contributed a lot and worked with **Ajax** and **API**. Dynamically created elements containing Movie Poster Img, Movie Title, Movie Overview, Movie link to YouTube. Developed basic **Laravel Routing** between pages. Connected Ajax+Js to API and got data from API.

Nurillayev Azam : (Front-End) Has designed and developed from scratch the "**Dashboard**" page, "**Movie genres**" page template for dynamic use, the one that can be accessed after log in. Used **js, css, bootstrap**.

Abdukhaliyev Akhadjon : (Back-end)

Has developed the "**User update**" page and **Database**. Added all the needed functionality and components.

Nazarov Javokhirbek : (Back-end)

Has developed "**Contact**" and "**Sending Mail**". Used **API Swiftmail** the feedback to the admin. Used Html Forms extension и bootstrap.

Tulaev Ulugbek : (Front-End)

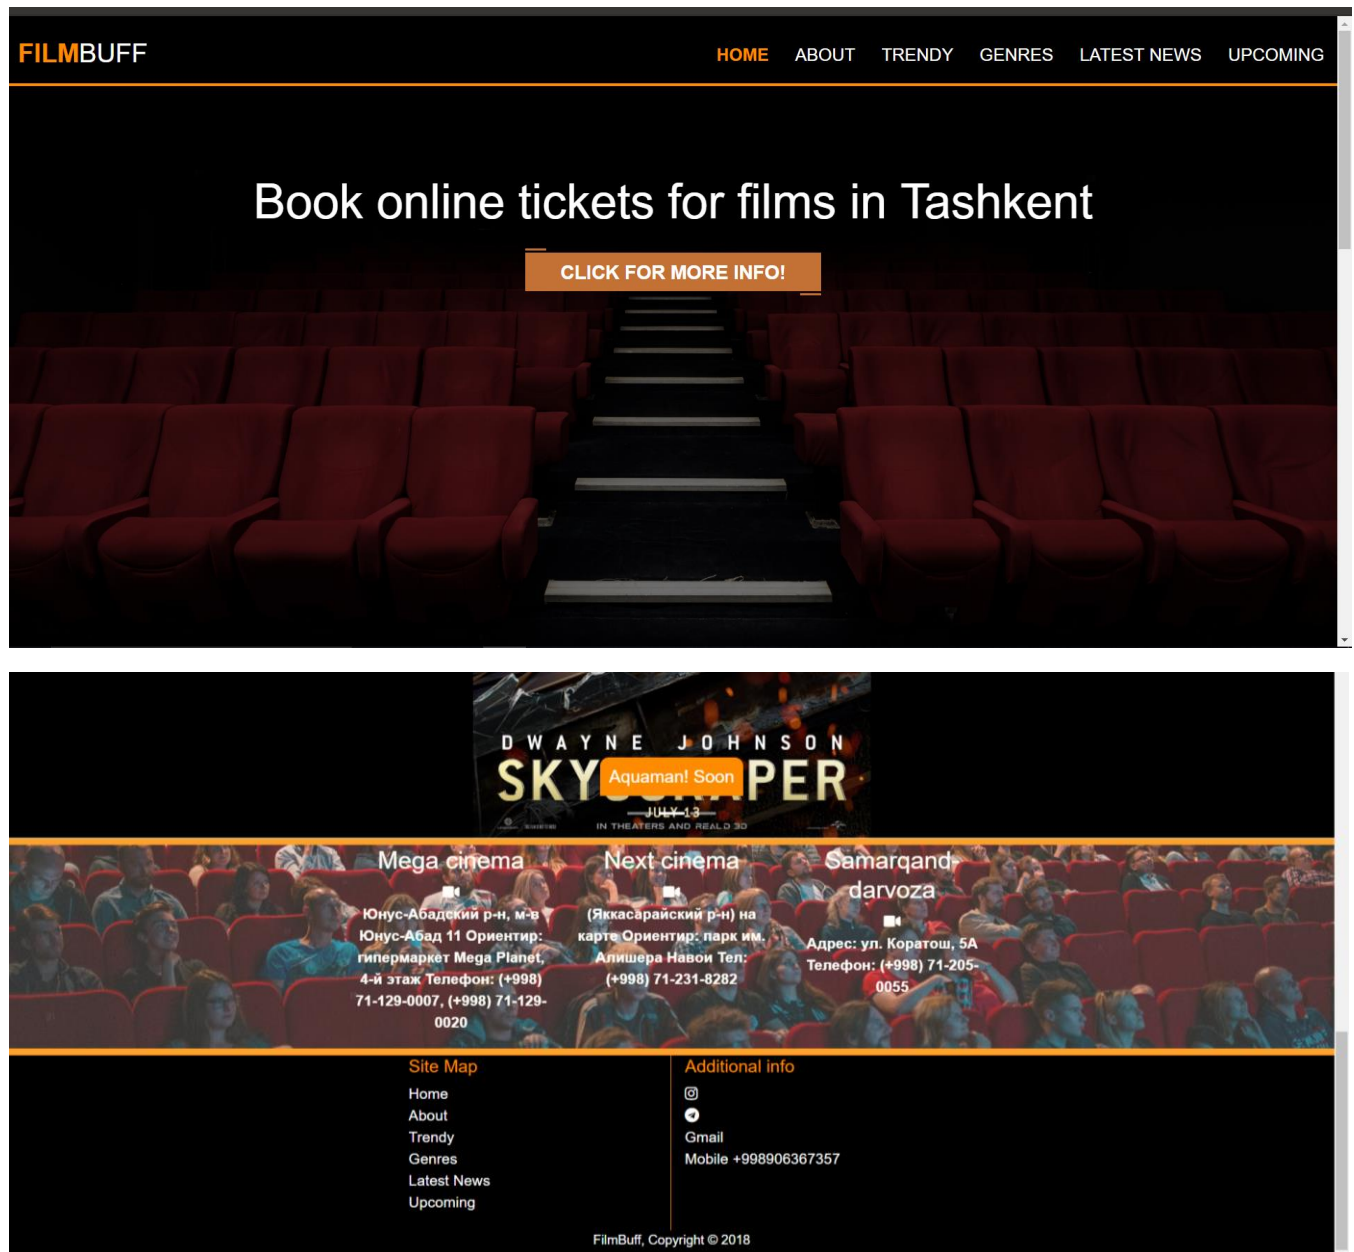

Has designed and developed from scratch the "**Main**" page, "**Account**" page and "**Tuition**" pages. Added all the required **js, css, bootstrap** features for the page to look professional and gentle. Made the mobile versions to add the responsive feature.

Turgunov Aytmukhammad : (Design)

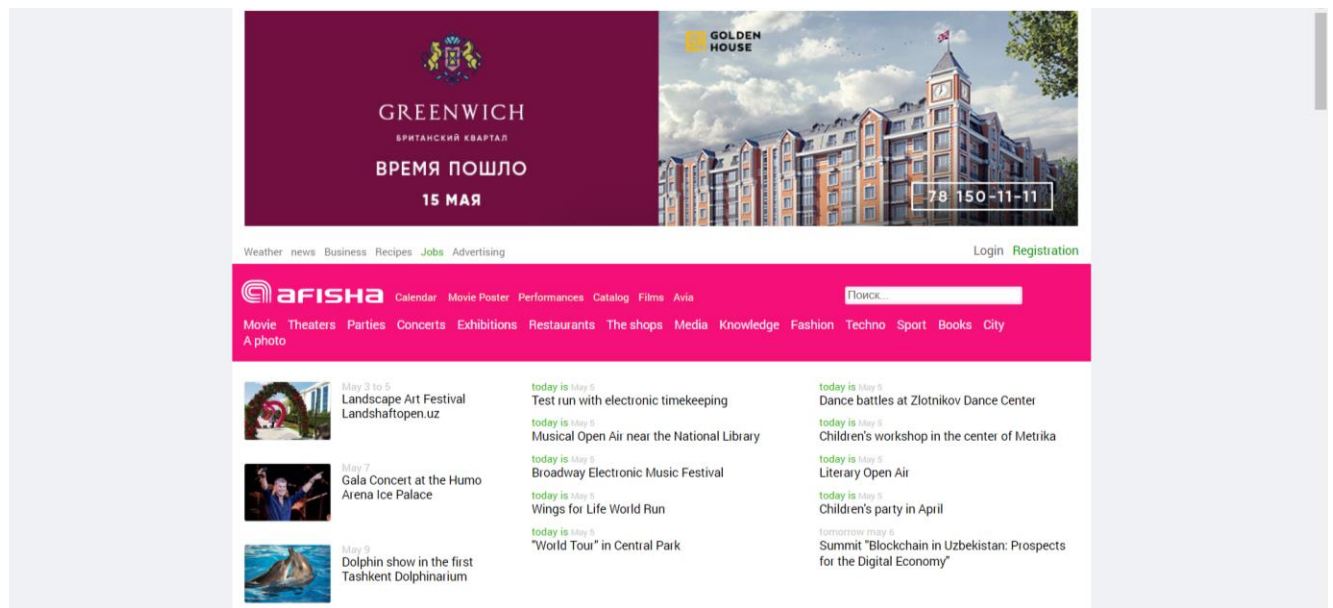

He prepared frontend resources using Photoshop and many useful sites like Pinterest, iconmaker and so on

Brief Information about site functionality

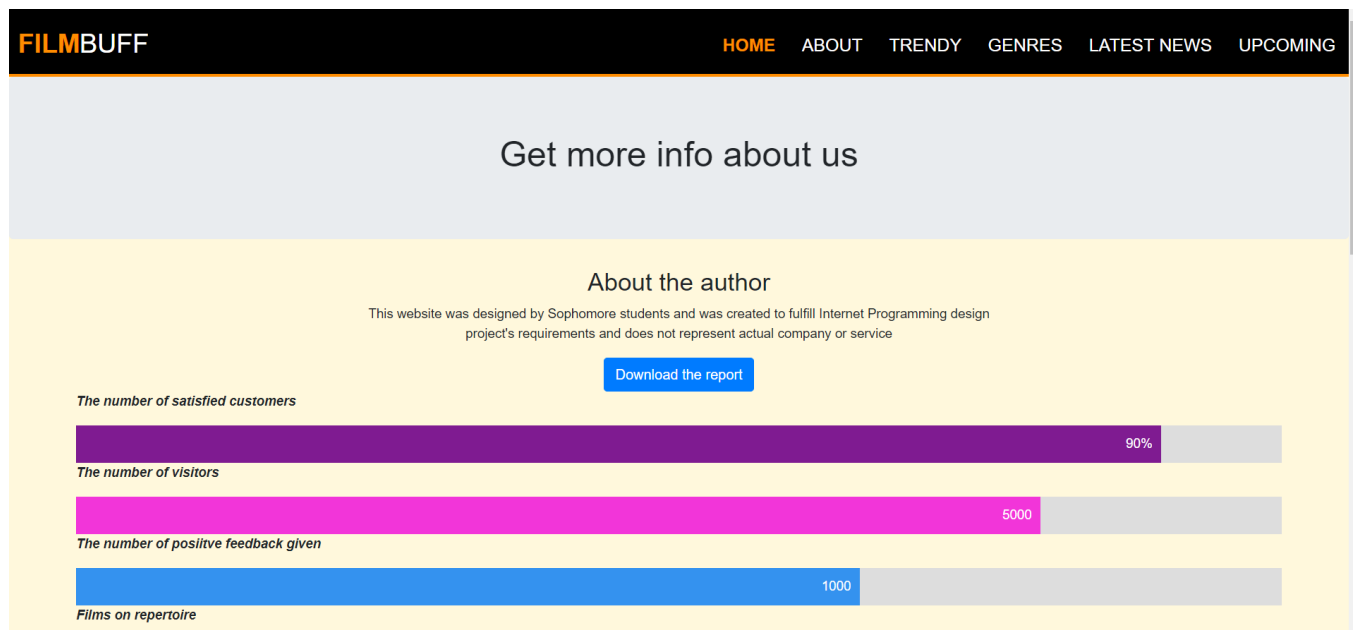

Main page of the site contains all needed sections including functionalities and gives opportunity to book tickets online for cinemas near the user.

And you can book easily by filling form after seeing available movies in the cinemas. For this functionality we used services of other sites.

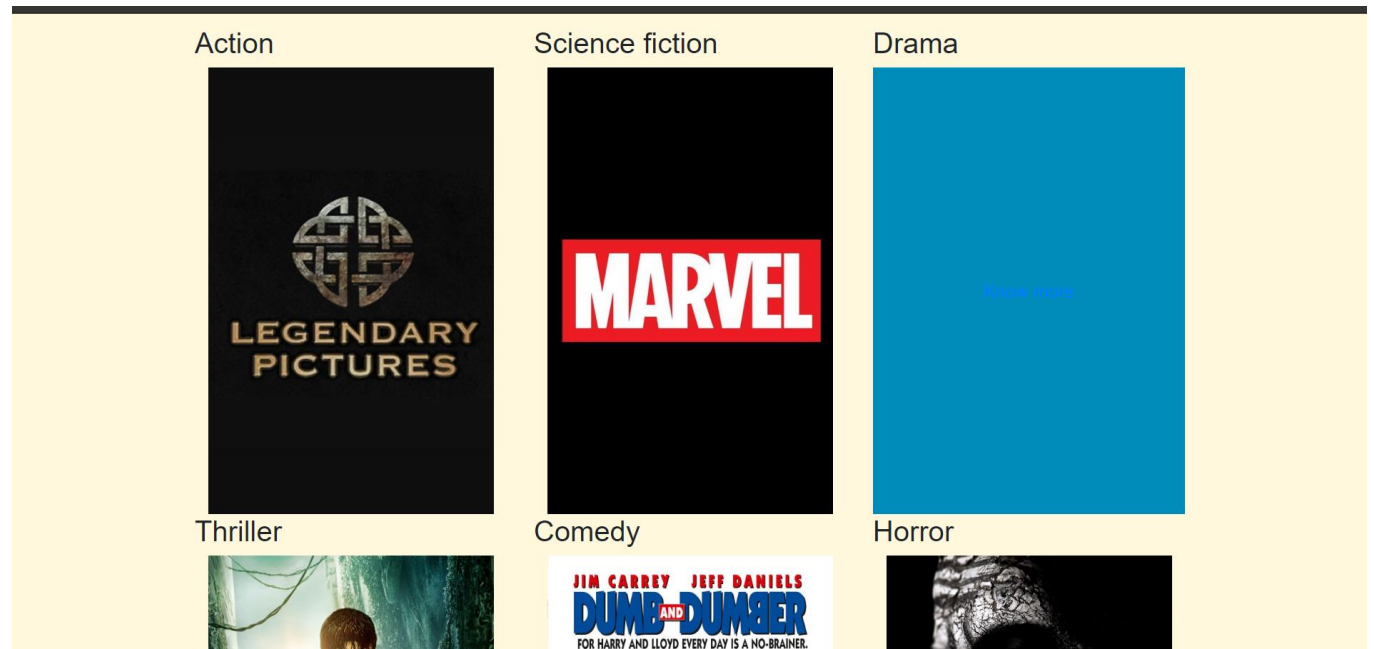

You can also take more information about site creators and site in about section.

In addition to this, our site suggests movie trailers which are in trend

And most importantly in the genres section you can find movies according to proper genres and all movies are sorted according to their genre. This gives very good chance for users to find the movies which they are searching for easily.

For learning about the latest movies in the world of media is enough to click the “latest news” in the upper bar. And this gives
